A POLITICAL FAILURE.-Last Saturday large posters announced that the Democracy would rally at the Court nomination of Geo. H. Pendleton. The time arrived, the bell rang, the German Band discoursed excellent music, a bon-fire was made in the street, but lazily over its broad expanse, presenting a scene of comfort and ease. But soon the outlines of civilization and refinement lit up the distant scene, and it stood forth like an oasis in a desert of waste, with its fine residences, thriving vineyards, and beautiful groves.

The island is owned by Mr. Kelly. whose name it bears, and contains an area of twenty-nine hundred acres. It is in a state of refined cultivation, and is a vast vineyard, grapes being its principal production. It is a favorite place of resort, and affords a large brick mansion, for the accommodation of visors, and several other buildings of note and elegance. It contains two large caves, which are annually visited by hundreds of people, and is a favorite place for fishing and sporting general–

The excursionists then dispersed in small parties about the island; some secured boats, and crossed to Giberal-tar; some spent the time in rambling through the groves, and along the beach, gathering mementos; other took skiffs, and rowed out on the lake. > THE HEROIC DEAD. Near the landing is the most attractive place on the island. We believe it was visited by all the excursionists. It is the spot where sleep the ashes of twelve of the heroes who fell in the battle of Lake Erie. The site is identified by a large willow tree, under whose wide-spreading branches they sleep un known in sweet repose. The willow is surrounded by a fence, constructed of wooden post, interwoven with chains. On the willow there is a shield, wreathed with evergreens, which bears the the following inscription: "The resting place of the fallen heroes of the battle of Lake Erie." It is a melancholy

ered to their final rest.

In the central part of the island, there is a large cave known as Put-In-Bay Mammoth Cave. It is reached by a low passage or dissure in the rocks, winding down perhaps forty feet, when it opens into a large subterranean chamber fourteen rods long and ten rods wide. The ceiling is hung with crystals, and is from four to fifteen feet in height; the floor is covered with loose stone, and is wet, and in some places muddy. It is lighted with lamps, which cast a sickly glare on surrounding objects. In one end of the cave there is a running stre in of water. We visited this cave in company with others, drank of its limpid waters, and passed out, thankful that we had escaped, unharmed, from the dark, damp, and gloomy place. THE CAVE.

HOMEWARD BOUND. Returning to the Reindeer, we found the ex-cursionists all on board, and at three o'clock the boat departed for Sandusky. The return trip was by the same route that we reached the island, and many of the scenes had lost their attraction.

on the return the excursionists were favored with piano music and singing, and many seemed to enjoy it. One fellow, in particular, who, when the music commenced, came rushing down stairs from the upper cabin, exclaiming—"Ho! Sam, come up stairs, and see a woman thumping music out of an old cupboard!" The fellow had drank too much wine on the island, as was the case with too many others, some of whom lost their hats overboard while coming up the bay.

As a Substitute for all Other Lights.

This article has been fully tested, and is worthy of entire confidence. It makes a clean beautiful light. It will not soil anything to which it is applied. It does not smoke the chimney. It has no unpleasant odor. It is cheap—only 40 ets per gallon.

And Best of all It is Perfectly Safe, Being

ABSOLUTELY NON - EX-PLOSIVE As he shall at any time be willing to have demonstrated. We also keep on hand Lamps, Chimneys, Burners, and Lanterns of various styles and

Goods Warranted as Represented. Burning Fluid and process of manufacturing the same, from Gasoline, feels convinced to the same to the ed from actual knowledge, that the different ingredients used in making the Ruse Burning Fluid does absolutely absolve and abstract all explosive gases, thus rendering the fluid safe and non-explosive. The vapor enduring a temperature of 7000 be-fore it is converted into gas, I regard it safe and secure from those fearful explosions
